

Pierre Graef

Freelance Data Engineer

Python/Spark

EXPERIENCE

Data Engineer

European Collectivity of Alsace

November 2024 – Present, Strasbourg – France

- Designed and deployed data pipelines and APIs using Python, Talend, and Java for data integration and transformation
- Developed and managed SAP Business Objects universes and BI models in Power BI
- Monitored and maintained databases (MySQL, Oracle, SQL Server)

Data Projects Intern

Munich Re - Reinsurance

March 2024 – September 2024, Munich – Germany

- Developed and implemented an actuarial tool in R
- Automated data collection, cleaning, and updating processes for large datasets (SQL, CSV, external APIs)
- Reduced processing time by 90%

Data Engineer

www.pierregraef.com - Portfolio Projects

September 2024 – Present

- MarketPulse API: Built a Dockerized Python API to deliver real-time economic and financial indicators (CAC 40, exchange rates, BTC/EUR)
- ELT to Dashboard Pipeline: Designed a full data pipeline from ingestion to visualization for historical Formula 1 data

EDUCATION

Master's Degree in Applied Mathematics – Mathematical Engineering & Data Science

University of Haute-Alsace & Mälardalen Universitet

2022 - 2024

Bachelor's Degree (Double Major) in Mathematics & Quantitative Economics

Université de Strasbourg

2019 - 2022, Strasbourg
